1. NATURE OF OPERATIONS

Empress Royalty Corp. (“Empress” or the “Company”) was incorporated on March 2, 2020 under the laws of the Province of British Columbia, Canada. The Company commenced trading on the TSX Venture Exchange (“TSX-V”) on December 29, 2020 under the symbol EMPR. On February 19, 2021, the Company commenced trading on the OTCQB Venture Market in the United States under the symbol EMPYF. The corporate office and registered and records office is located at Unit 1 – 15782 Marine Drive, White Rock, BC, Canada, V4B 1E6.

Empress is primarily in the business of structuring and creating proprietary precious metal royalty and streaming agreements for its own portfolio and also may acquire certain interests from time to time. The Company is focussed primarily on small to mid-tier producing or development stage mining companies, where immediate or near-term revenue can be generated but may consider earlier stage opportunities, as appropriate.

These condensed interim consolidated financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. As at March 31, 2022, the Company had a working capital deficiency of \$773,378. However, management estimates that projected royalty and stream revenues will provide the Company with sufficient financial resources to carry out currently planned operations through the next twelve months. Additional financing may be required by the Company to complete its long-term strategic objectives. There is no assurance that the Company will be able to obtain adequate financing in the future or that such financing will be on terms acceptable to the Company.

Since March 2020, several measures have been implemented in Canada as well as Mexico, Mozambique and Peru, where the Company holds royalties and streams in response to the increased impact from the coronavirus (“COVID-19”). These measures, which include the implementation of travel bans, self-imposed quarantine periods, social distancing, vaccine or testing mandates, and in some cases mine closures or suspensions, have caused material disruption to business globally. Global financial markets have experienced significant volatility. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions. There are significant uncertainties with respect to future developments and impact to the Company related to the COVID-19 pandemic, including the duration, severity and scope of the outbreak and the measures taken by governments and businesses to contain the pandemic. While the impact of COVID-19 is expected to be temporary, the current circumstances are dynamic and the impact of COVID-19 on our business operations cannot be reasonably estimated at this time, such as the duration and impact on future production for our partner operators at their respective mining operations. However, the current situation has slowly been improving and is expected to have less of an adverse impact on the Company’s business, results of operations, financial position and cash flows going forward.

2. CHANGE IN ACCOUNTING POLICY

Functional and presentation currency

The Company elected to change its presentation currency from Canadian dollars to United States (“US”) dollars. The change in presentation currency is a voluntary change which is accounted for retrospectively. These condensed interim consolidated financial statements have been restated to US dollars using the procedures outlined below:

- Assets and liabilities in the Statement of Financial Position have been translated into US dollars at the closing foreign currency rates on the relevant statement of financial position dates.
- Statement of Loss and Comprehensive Loss and Statement of Cash Flows have been translated into US dollars using average foreign currency rates prevailing for the relevant period.
- The equity section of the Statement of Financial Position, including foreign currency translation reserve, deficit, share capital and the other reserves, have been translated into US dollars using historical rates.
- Earnings per share disclosures have also been restated to US dollars to reflect the change in presentation currency.

The functional currency of the parent is the Canadian dollar, while the presentation currency of the Company is the US dollar. The functional currency of the Company’s subsidiary is the US dollar.

3. BASIS OF PRESENTATION

Statement of compliance

These unaudited condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting. The condensed interim consolidated financial statements should be read in conjunction with the annual audited financial statements for the fifteen months ended December 31, 2021.

The Company uses the same accounting policies and methods of computation as in the annual consolidated financial statements for the 15 months ended December 31, 2021.

The consolidated financial statements are presented in US dollars.

Basis of consolidation

These condensed interim consolidated financial statements include the accounts of the Company and its wholly owned Canadian subsidiary, Empress Royalty Holdings Corp., the holder of all of the Company’s current royalty and stream investments. All inter-company balances and transactions, and any income and expenses arising from inter-company transactions, are eliminated on consolidation.

3. BASIS OF PRESENTATION (continued)

Significant accounting estimates, judgments and assumptions

The preparation of the Company's consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the consolidated financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Information about such judgements and estimates are contained in the accounting policies and/or the notes to the consolidated financial statements. Areas of judgement and estimation that have the most significant effect on the amounts recognized in the consolidated financial statements are outlined below.

Impairment of royalty and stream interests

Royalty and stream interests are assessed on a periodic basis for indicators of impairment. The assessment of the fair values of royalty and stream interests requires the use of estimates and assumptions for recoverable production, commodity prices, discount rates, foreign exchange rates and reserve and resources estimates. Changes in any of the estimates used in determining the fair value of the royalty or stream could impact the impairment analysis.

Valuation of share-based compensation

Management determines the costs for share-based compensation using market-based valuation techniques. The fair value of the market-based share awards is determined at the date of grant, using generally accepted valuation techniques. Assumptions are made and judgement is used in applying these valuation techniques including estimating the future volatility of the share price, expected dividend yield, future employee turnover rates, and future share option exercise behaviours and corporate performance. Such judgements are inherently uncertain and changes in these assumptions affect the fair value of the estimates for share-based compensation.

3. BASIS OF PRESENTATION (continued)

Mineral reserves and mineral resources

The Company's royalty and stream interests that generate economic benefits are considered depletable and are depleted on a units of production method over the life of the mine to which the interest relates, which is determined using available information on proven and probable mineral reserves and the portion of mineral resources expected to be classified as mineral reserves at the mine corresponding to the specific agreement. These calculations require the use of estimates and assumptions, including the mineral reserves and mineral resources related to each royalty or stream interest as provided by the mine operator. Mineral reserves and mineral resources are estimates of the amount of minerals that can be extracted from the mining properties at which the Company has royalty or stream interests. Changes to the mineral reserves and/or mineral resource assumptions could directly impact the depletion rates used. Changes to the depletion rates are accounted for prospectively.

Revenue from royalty and stream interests

During the three months ended March 31, 2022, the Company earned stream revenue of \$427,032 (2021 - \$Nil) from the gold stream agreement on the Sierra Antapite mine in Peru.

Sierra Antapite Gold Stream

In July 2021, the Company structured and entered into a stream agreement with Sierra Sun Group, a private corporation, in respect of its Sierra Antapite producing gold mine located in Peru. The Company purchased an amount of gold equal to 2.25% of the payable gold production in return for upfront cash consideration of \$5,000,000 plus an additional amount for each ounce delivered equal to 20% of the prevailing market price. Subsequently, in both October 2021 and December 2021, the Company agreed to purchase an additional 1.125% in exchange for upfront cash of \$2,500,000 each time. As such, the Company will receive a total of 4.5% of payable gold production until 11,000 ounces have been delivered, thereafter dropping to 1% for the life of mine.

5. ROYALTY AND STREAM INTERESTS (continued)

Tahuehueto Silver Stream

In April 2021, the Company structured and entered into a stream agreement with Altaley Mining Corporation, a publicly traded company (TSX.V: ATLY) in respect of its Tahuehueto silver project located in Mexico. Empress purchased an amount of silver equal to 100% of the payable silver production in return for upfront cash consideration of \$5,000,000 plus an additional amount for each ounce delivered equal to 20% of the prevailing market price until 1,250,000 ounces have been delivered. Thereafter, the amount of payable silver will drop, to 20% on the same terms for a maximum of 10 years from the date of initial production. The cash consideration was paid in two tranches of \$2,000,000 and \$3,000,000 respectively in April 2021 and July 2021.

Manica Project Royalty

In April 2021, the Company structured and entered into a net smelter royalty (“NSR”) agreement with Mutapa Mining & Processing LDA (“MMP”), a private corporation, in respect of its Manica hard rock gold project, located in Mozambique. The Company paid \$2,000,000 for a 2.25% NSR interest. In January 2022, the Company paid an additional \$1,000,000 to increase the NSR interest to 3.375% on the first 95,000 ounces of gold and a 1.125% NSR interest thereafter for the life of the mine.

Pinos Project Royalty

In November 2020, the Company structured and entered into a 1% NSR agreement with Candelaria Mining Corp., a private corporation, in respect of its Pinos project located in Mexico for cash consideration of \$1,500,000. The transaction was a combination of a newly created 0.5% NSR royalty on the Pinos project for consideration of \$750,000 and the purchase of an existing 0.5% NSR royalty for consideration of \$750,000.

Other Royalties

In July 2020, the Company acquired a portfolio of NSR royalties, all of which are on early-stage exploration properties located in Canada that range between 0.5% and 1.5%.

On December 22, 2021, the Company entered into a credit agreement (the “Nebari Facility”) with Nebari Natural Resources Credit Fund I, LP (“Nebari”), an arm’s length party, pursuant to which the Company was provided with a \$15,000,000 senior secured credit facility. The Company’s received \$4,500,000 upon closing of the Nebari Facility.

The Nebari Facility bears interest at a rate of 10% plus the greater of (i) Libor and (ii) 1% paid quarterly, matures December 22, 2023 and is secured by the royalty and stream interests of the Company as at December 22, 2021 and any future royalty and stream interests which are wholly and/or partially funded with proceeds from the Nebari Facility. The Nebari Facility is subject to standard events of default, as well as a requirement to maintain positive working capital (excluding the current portion of the Nebari loan) and no less than C\$750,000 of cash. As at March 31, 2022, the Company is not in default of these covenants.

On December 23, 2021, the Company issued 7,500,000 warrants to Nebari at value of \$965,720, in addition to incurring legal fees and other transaction costs in connection with the initial drawdown of the Nebari Facility. These transaction costs will be accreted up to the maturity date.

During the three months ended March 31, 2022, the Company recorded finance costs of \$300,647, being interest expense of \$131,649 and accretion of transaction costs of \$168,998.

11. SEGMENTED INFORMATION

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segment, has been identified as the Chief Executive Officer.

As at March 31, 2022, the Company's business is the structuring and creation of mining royalty and streaming interests for their own portfolio. The geographical breakdown of the Company's royalty and stream interests is described in Note 5. All of the Company's revenue is derived from the Sierra Antapite gold stream in Peru as described in Note 5.

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial instruments

Financial instruments are classified into one of the following categories: fair value through profit or loss ("FVTPL"); fair value through other comprehensive income ("FVTOCI"); or at amortized cost. The carrying values of the Company's financial instruments are classified into the following categories:

		March 31, 2022	December 31, 2021
Cash and cash equivalents	FVTPL	\$ 862,451	\$ 2,027,874
Receivables	Amortized cost	11,057	10,201
Trade and other payables	Amortized cost	(456,747)	(416,198)
Loan	Amortized cost	(3,298,127)	(3,140,831)

The Company's financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 – inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 – inputs to valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 – inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The carrying value of receivables, trade and other payables and the loan approximates their fair value due to its short-term nature. Cash and cash equivalents are recorded at fair value using Level 1 of the fair value hierarchy.

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)
